The Bass Model or Bass Diffusion Model was developed by Frank Bass. It consists of a simple differential equation that describes the process of how new products get adopted in a population. The model presents a rationale of how current adopters and potential adopters of a new product interact. The basic premise of the model is that adopters can be classified as innovators or as imitators and ...

Firms are usually best off with a portfolio that has a balance of firms in each category. The cash cows tend to generate cash but require little future investment. On the other hand, stars generate some cash, but even more cash is needed to invest in the future – for research and development, marketing campaigns, and building new manufacturing facilities.
