WHO Library Cataloguing-in-Publication Data: Natural ventilation for infection control in health-care settings. 1. Ventilation methods. 2. Air microbiology.

Natural Ventilation for Infection Control in Health-Care

Lyme disease, or borreliosis, is caused by spirochetal bacteria from the genus *Borrelia*, which has 52 known species. Three main species (*Borrelia garinii*, *Borrelia afzelii*, and *Borrelia burgdorferi* s.s.) are the main causative agents of the disease in humans, while a number of others have been implicated as possibly pathogenic. *Borrelia* species in the species complex known to cause Lyme disease ...

The American Society for Microbiology (ASM) is the oldest and largest single life science membership organization in the world. Membership has grown from 59 scientists in 1899 to more than 39,000 members today, with more than one third located outside the United States. The members represent 26 disciplines of microbiological specialization plus a division for microbiology educators.

Infection is the invasion of an organism's body tissues by disease-causing agents, their multiplication, and the reaction of host tissues to the infectious agents and the toxins they produce. Infectious disease, also known as transmissible disease or communicable disease, is illness resulting from an infection.. Infections are caused by infectious agents including viruses, viroids, prions ...
