Major Learning Outcomes Immunology & Medical Microbiology. Goal 1: The Bachelor of Science in Immunology and Medical Microbiology program is designed to provide students with a thorough understanding of the basis of the mammalian immune system and how it functions to protect the body from infectious agents in conjunction with an in-depth knowledge and understanding of pathogens.

Immunology & Medical Microbiology, BS < West Virginia

This course explores the basic principles of microbiology. Case scenarios and classroom discussions will allow the student to apply the framework and concepts of microbiology within the work place.

SCI250 Microbiology Course - University of Phoenix

Sterilization (or sterilization) refers to any process that eliminates, removes, kills, or deactivates all forms of life and other biological agents (such as fungi, bacteria, viruses, spore forms, prions, unicellular eukaryotic organisms such as Plasmodium, etc.) present in a specified region, such as a surface, a volume of fluid, medication, or in a compound such as biological culture media.

Sterilization (microbiology) - Wikipedia

leaning and Disinfection in Food Processing Operations

In microbiology, streaking is a technique used to isolate a pure strain from a single species of microorganism, often bacteria. Samples can then be taken from the resulting colonies and a microbiological culture can be grown on a new plate so that the organism can be identified, studied, or tested.. The modern streak plate method has progressed from the efforts of Robert Koch and other ...

Streaking (microbiology) - Wikipedia

1 USE OF THE MICROSCOPE The microscope is absolutely essential to the microbiology lab: most microorganisms cannot be seen without the aid of a microscope, save some fungi.
