Forecasting is a necessary evil which can vary from "seat of your pants" to in-depth computer applications. The problem is unless your forecasting process is producing the data for planning that results in good returns, you are using the wrong process, OR, you are applying the process in a wrong manner.

Linear Scheduling Method (LSM) is a graphical scheduling method focusing on continuous resource

utilization in repetitive activities.

Linear scheduling method - Wikipedia

A schedule or a timetable, as a basic time-management tool, consists of a list of times at which possible tasks, events, or actions are intended to take place, or of a sequence of events in the chronological order in which such things are intended to take place. The process of creating a schedule - deciding how to order these tasks and how to commit resources between the variety of possible ...
