implementation of its regulations through the use of risk-informed, and ultimately performance-based, approaches. The Probabilistic Risk Assessment (PRA) Policy Statement (60 FR 42622, August 16, 1995) formalized the Commission's commitment to risk-informed regulation through the expanded use of PRA.

## **REVISED March 1, 1999 RISK-INFORMED AND PERFORMANCE-BASED**

A new framework for a risk-informed performance-based approach to fire safety analysis and design has been proposed. It is structured around a paradigm in which the performance analysis is conducted relative to the performance of a building-occupant system within a broader context of the managing risk of an acute event (e.g., fire) on the chronic state of the system.

Uncertainty is essential to an risk management design process that is efficient and minimizes design rework  
• Discussions on "how safe is safe enough" are enabled by quantification of defense in depth using risk informed and performance based metrics (including uncertainty)  
• Balance/Blended deterministic and risk thinking is the

Risk-Informed and Performance-Based Regulations for Nuclear Power Plants The American Nuclear Society (ANS) supports and advocates for Risk-Informed and Performance-Based (RIPB) safety design and licensing approaches because such approaches will assure protection of public health and safety in the most effective, efficient and transparent manner.

performance based and others that can be risk informed--a few that can be both. He believes that more of our standards are amenable to performancebased methods so the statement is true. - Amir Afazli expressed his concern that there are missed opportunities to incorporate risk-informed methods.

## **Using Risk as a Basis for Establishing Tolerable**

The book "Risk Informed Performance Based Industrial Fire Protection" is an excellent reference framework for anybody who is concerned with fire risk and decision making. Most valuable is that the book offers practical techniques that can readily be adopted.

the risk-informed integrated decision-making process. The success key for a systematic application of PRA in this stage is to establish a risk-informed configuration risk management program at an operating plant to ensure safe and economical operation.

Risk-informed performance-based analysis and design is a process in which stakeholder and regulatory goals and objectives are clearly stated and agreed, a threat and risk assessment is conducted to understand the events that may impact on a building and its occupants, and analysis of the
