is a four-manifold which admits a countable infinity of different smooth structures. Open question: Is true that any topological four-manifold which has at least one smooth structure has infinitely many non-diffeomorphic smooth structures? Let us dispose of one point right away: the answer would be the same if one used some

In a recent paper, Park constructs certain exotic simply-connected four-manifolds with small Euler characteristics. Our aim here is to prove that the four-manifolds in his constructions are minimal.

Constructions of smooth 4-manifolds The sign of $\langle SW(X), \hat{I}^2 \rangle$ depends on an orientation of $H_0(X, \mathbb{R}) \cong \det H_2(X, \mathbb{R}) \cong \det H_1(X, \mathbb{R})$. If $\langle SW(X), \hat{I}^2 \rangle \neq 0$, then \hat{I}^2 is called a basic class of X . It is a fundamental fact that the set of basic classes is finite. Furthermore, if \hat{I}^2 is a basic

This result inaugurated a major effort to classify all possible smooth and topological structures on manifolds of dimension at least 5. By the mid 1970's the main outlines of this theory were complete, and explicit answers (especially concerning simply connected manifolds) as well as general qualitative results had been obtained.

Let S be a smooth, simply connected, complex projective surface. If the oriented $\mathbb{C}P^2$ -4-manifold underlying S can be decomposed as a smooth, oriented connected sum of oriented 4-manifolds Y_1, Y_2 , then one of Y_1, Y_2 has a negative definite intersection form.

ory, embeddings of smooth manifolds into Euclidean spaces, approximation of continuous maps by smooth ones, and quotients of manifolds by group actions. The next four chapters, 8 through 11, focus on tensors and tensor fields on manifolds, and progress from Riemannian metrics through differential

On normalized Ricci flow and smooth structures on four-manifolds with $b_2 = 1$ Masashi Ishida, Rares A. Răşdeaconu, and Ioana S. Şuvaina Abstract. We find an obstruction to the existence of non-singular solutions to the normalized Ricci flow on four-manifolds with $b_2 = 1$. By using this
