`net.sf.jasperreports.allow.element.negative.width`: A property that determines whether elements having negative width values are allowed. If this value is set to false, the report is verified not to contain elements with negative width values. This is useful when the report is meant to be exported to grid-based formats such as HTML, XLS or CSV, which might enter an infinite loop.

Tooth loss is a process in which one or more teeth come loose and fall out. Tooth loss is normal for deciduous teeth (baby teeth), when they are replaced by a person's adult teeth. Otherwise, losing teeth is undesirable and is the result of injury or disease, such as dental avulsion, tooth decay, and gum disease. The condition of being toothless or missing one or more teeth is called edentulism

Materials and methods. Imputation methods based on statistical techniques, e.g., mean, hot-deck and multiple imputation, and machine learning techniques, e.g., multi-layer perceptron (MLP), self-organisation maps (SOM) and k-nearest neighbour (KNN), were applied to data collected through the "El Álamolamo" project, and the results were then compared to those obtained from the listwise ...

Missing data imputation using statistical and machine

Another problem faced when collecting data is that some data may be missing. For example, in conducting a survey with ten questions, perhaps some of the people who take the survey don't answer all ten questions. In Identifying Outliers and Missing Data we show how to identify missing data using ...
