Psychological testing is the administration of psychological tests, which are designed to be "an objective and standardized measure of a sample of behavior". The term sample of behavior refers to an individual's performance on tasks that have usually been prescribed beforehand. The samples of behavior that make up a paper-and-pencil test, the most common type of test, are a series of items.

**Intelligence** To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing". But not knowing is not always obvious or clearly understood. That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.

Many employers utilize personality tests in the employment selection process to identify people who have more than just the knowledge and skills necessary to be successful in their jobs. If anecdotes are to be believed "Dilbert must be getting at something or the cartoon strip would not be so popular" the work place is full of people whose personalities are a mismatch for the positions they ...
